The INTRODUCTION.

Queen ELIZABETH's Opinion concerning Transubstantiation. See a new Argument against it.

DURING the Reign of Queen Mary, the Lady *Elizabeth* being a Prisoner at *Woodstock*, a Popish Priest came to visit her, and after some Discourse, press'd hard upon her to declare her Opinion of the *Real Presence* of Christ in the Sacrament, to whom she truly and wearily answered in these following Verses.

*'Twas God the Word that speak it ;
He took the Bread and break it :
And what that Word did make it,
That I believe and take it.*

The Sense of which is more fully explain'd in the following Poem.

A Meditation how to discern the Lord's Body in the Blessed Sacrament.

And if Mens Fingers cannot make the *Wheat*,
Which makes the *Sacramental Bread* we eat,
What Art of *Transubstantiation* can
Make God of *Wafers*, who of *Dust* made Man ?
When we are by the Apostle truly told,
The *Godhead* is not like Silver or Gold ;
Or any Thing Corruption's Pow'r can waste,
For he to all Eternity must last :
And if the Art of Man can make his *Maker*,
The *Smith* may do as well, as doth the *Baker* ;
Bread was the *Substance* which our Saviour gave ;
And *Bread* it was th' Apostles did receive ;
His *Real Body* was but in the *Sign*,
He gave his *Flesh* and *Blood* in *Bread* and *Wine* :
For if his *Body* he did then divide,
He must have eat himself before he dy'd.

His

The I N T R O D U C T I O N.

His Human Body which for us was giv'n,
Is giv'n to us of Bread which came from Heav'n ;
The which if we unworthily receive,
We eat our Judgments and ourselves deceive.
In not discerning what his Body is
Our Souls are rob'd of everlasting Bliss.
We must believe the Words of him who said,
This is my Body, when he gave the Bread :
And sure that Blood which curdl'd in each Vein,
Did in his sacred Body still remain,
'Till he was safely Crucify'd and Slain.
However, there's great Influence therein,
Which expiates and cleanseth us from Sin :
We are made one with him in Holy Union,
When we in Faith receive the bless'd Communion.
In Commemoration of his bitter Passion,
Who shed his Blood to purchase our Salvation ;
We in his Merits must depend alone,
Sufficient 'tis that Merit we have none :
Nor can there any other Name be giv'n,
To save us, but by him who sits in Heav'n.
His Body here on Earth need not appear,
When Angels to the Women say, *He is not here* ;
He's not i'th' Press nor Cup board as they say,
For then the Mice might carry him away.
The Primitive Christians never were so blind,
To think he could be blown away with Wind,
Or that some Theives or Robbers might devour
Him who created Heaven by His Power.
We are not sav'd by *Sense*, but by our *Faith*,
And ought to credit what our Master saith.
He call'd Himself a *Vine*, and yet we see,
He was a perfect *Man* and not a *Tree*.
He call'd Himself a *Door* ; 'tis understood,
We enter Heav'n thro' Him, and not thro' *Wood*.

The Protestant Remembrancer.

He call'd Himself a *Way*, the which doth lead,
Our Steps to Heav'n, yet none doth on Him tread.
His Blessed Words were oft'times mystical,
And are not rightly understood by all;
Save such on whom he doth the Gift bestow,
Who to the Ignorant the Truth may show.
His Blessed Body Heaven must contain,
Where He a King eternally doth Reign,
Until the Restitution of all;
Then we with Him and Angels ever shall
Sing Hallelujahs in their Hierarchy,
For where He is, there must His Servants be.

The Protestant Remembrancer.

Good Reader,

BEFORE you go over to Popery, stay and see the Controversy ended, whether the *Turk* or Pope be the Antichrist; for though they both bid fair for't, yet it is hoped his Holiness will carry it.

The *Turks* have gross *Anthropomorphitical* Conceits of God, that is, holding that God hath a Corporeal Shape; *Mabomed* in his Journey to Heaven tells us, that God laid one of His Hands upon his Shoulder, and it was so cold that he thought in his very Heart it would have put him into a cold Fit of an Ague, and the Papists come not short of him, who in their Licensed Prayer Books, Picture God as a down worn old Man, with a grave Beard, and grey Hair, sitting in an old rotten Chair, no doubt to beget in the Minds of their Devotees suitable Notions to the Spiritual Nature of the Divine Majesty. The *Turks* speak very honourably of Christ, call him the Word of God, a holy Person, but withal persecute

The Protestant Remembrancer.

secute and enslave the Christians. And the Pope gives Christ a great many good Morrows, but if he can get true Christians into his Fingers, he will make them confess that it is more eligible to live under the *Ottoman Power*, than the *Roman Tyranny*; that the *Horns* of the *Crescent*, are not so sharp as the *Talons* of the *Eagle*.

*To Things immortal, Time can do no wrong,
And which never is to die, for ever must be young.*

The *Turks* hold that in the Day of Judgment, God will take some good Works from them who can best spare them, and lend them to such as have more; which Principle the Pope hath stolen from the *Turks*, and would fain have us believe it was his own Invention. The *Turk* allows himself good Store of Wives, and the Pope though he forbids lawful Marriages, which God commands, yet he permits Whores to all, and Concubines to the Priests, which God forbids. *Turk* and Pope trade hugely in Miracles, which, if well sifted to the Bran, would prove, either the Forgeries of Knaves, or the Delusion of Devils.

The *Turk* prohibits all Men to dispute his Religion, and you had better quarrel with all God's Commandments, than question one of the Precepts of the infallible Chair.

The *Turk* admits of no Learning in his Dominions, and the Pope locks up the Scriptures in an unknown Tongue, lest the abused Vulgar should discover in Time his open Contradictions to it. The *Turk* will be tied by no Oath, and you may sooner hold an Eel by the Tail, than a Priest by an Oath of Sacrament.

I might spin out the Thread of this Parallel into infinite Length, but having neither Time nor Room, I shall leave it till another Opportunity.

*None looks to be accounted,
More than a Beggar mounted.*

A Table of the Terms and their Returns for this
present Year 1740.

Hilary-Term begins *Jan. 23*, ends *Feb. 12*.

Returns, or Essoign Days.	Exc	Ret.	Ap	W. D.
In eight days of <i>St Hilary</i> , <i>Jan. 20</i>	21	22	23	<i>Wed.</i>
From the day of <i>St Hilary</i> in 15 days	27	28	29	30 <i>Wed.</i>
On the morr. of Purif. of blest. <i>Mary Feb. 3</i>	4	5	6	<i>Wed.</i>
In 8 days of the Purif. of the blest. <i>Ma. 9</i>	11	11	12	<i>Tuesf.</i>

Easter Term begins *April 23*, ends *May 19*.

From the day of <i>East.</i> in 15 days, <i>April 20</i>	21	22	23	<i>Wed.</i>
From the day of <i>Easter</i> in 3 weeks,	27	28	29	30 <i>Wed.</i>
From the day of <i>East.</i> in one month, <i>May 4</i>	5	6	7	<i>Wed.</i>
From the day of <i>Easter</i> in 5 weeks	11	12	13	14 <i>Wed.</i>
On the morr. of the <i>Ascen.</i>	16	17	17	19 <i>Mon.</i>

Trinity Term begins *June 6*, ends *June 25*.

On the morr. of the holy <i>Trinity</i> , <i>June 2</i> ^{III}	3	4	6	<i>Frid.</i>
In 8 days of the holy <i>Trinity</i> ,	8	9	10	11 <i>Wed.</i>
From the day of the holy <i>Trin.</i> in 15 days	15	16	17	18 <i>Wed.</i>
From the day of holy <i>Trin.</i> in 3 weeks,	22	23	24	25 <i>Wed.</i>

Michaelmas Term begins *October 23*, ends *Nov. 28*.

From the day of <i>St Mic.</i> in 3 weeks, <i>Oct. 20</i>	21	22	23	<i>Tburf.</i>
From the day of <i>St Mich.</i> in 1 month.	27	28	29	30 <i>Tburf.</i>
On the morr. of <i>All-Souls</i> , <i>November 3</i>	4	5	6	<i>Tburf.</i>
On the morrow of <i>St Martin</i> ,	12	13	14	15 <i>Satur.</i>
In eight days of <i>St Martin</i> ,	18	19	20	21 <i>Frid.</i>
From the day of <i>St Martin</i> in 15 days	25	26	27	28 <i>Frid.</i>

N. B. No Sittings in *Westminster-Hall* on *Ascension-day*,
Midsummer-day, the 1st and 2d of *November*, and the 2d of
February.

The *Exchequer* opens eight Days before any Term, except
Trinity, before which it opens but four Days.

Note, The first and last Days of every Term are the first and
last Days of Appearance.

January hath XXXI Days.

All Hail (my Masters!) I must now implore,
 (I know no Plot, save that which keep us poor,)
 Your Ticket for a Twelve Months Recreation,
 And this of mine to gain your Approbation.
 All my Designs lurk in their Rural Strains,
 My Guts conspire, indeed, but not my Brains.

Subtract from the equal Time.

No Nation under the Sun could be more happy, if the great Commandment of our Lord and Saviour were but sincerely observed amongst us, that is, Love one another. We have great Hopes that now Things are composed and put into a very good Order to the general Satisfaction of all the Nation Three Planets Retrograde at the Beginning, and ♀ ♀ ♀ from cardinal Signs, ♀ in his Detriment, and ♂ in his Exhalation, The 20 Day of this Month, 1706, was born his Royal Highness Frederick Prince of Wales. this should indicate as if some great Warrior, or Statesman falls under the Frowns of his Prince for being too diligent in contriving how to make himself greater than his Neighbours.

February hath XXIX Days.

I'm hugely taken with the golden Train,
 Yet Greatness without Goodness I disdain;
 Those lofty Stars which glide along the Sphere,
 A Spungy Head full ill becomes a Peer.
 Persons of Honour, should have Princely Parts,
 No empty Cock-Lofts, nor deceitful Hearts.

February 1740.

Full Moon the first day, at 6 at night.

Last Quarter 9 day, 31' past 2 in the afternoon.

New Moon 16 day, 1st past 6 in the morning.

First Quarter 23 day, 34¹ past 6 in the morning.

♂ ♀ and ♀ adorn the S. West in the evening.

[illegible]

March hath XXXI Days.

March verifies the Proverb, for you'll find,
 He's Lyon like, as well as Lamb in Kind ;
 Since then Superiour Worlds so well agree,
 This World of ours, (sure) reconcil'd will be :
 Heaven's all commanding Influence produce,
 Peace to poor Shrubs, and 'mong tall Cedars truce.

Subtract from the equal Time.

April hath XXX Days.

Majors each Morning with a gentle Ray,
 Ushers the Sun, and summons' us away,
 From lazy Beds, our Bodies up to rise
 When Day begins to issue from the Skies ;
 Th' Air's cloudy Robe, returns to chrystal clear,
 And smiling Heaven's bright Torches re-appear.

Our Easter and the
 Roman Easter are this
 Year on the same Day.
 Tranquility gene-
 rally appears in most
 Parts of Europe; now
 about expect to hear of
 a notable Marriage, in
 or near London. Mer-
 cury becomes Retro-
 grade in the Hybernian
 Horoscope, infers that
 we shall hear of many
 Robberies (if not Mur-
 ders) transacted in this
 Island. Some unsea-
 sonable Disputes arise
 about Leagues, Arti-
 cles and Contracts, and
 other Controversies are
 begotten by People of
 contrary Judgments in
 Matters Divine, much
 to the Disturbance of
 several Magistrates,
 some complain of hard
 Measure, others al-
 perse Authority.

May hath XXXI Days.

England would fain transplant her fragrant Flower,
Amongst the Tories who unite their Pow'r,
To pull the Crown from off the Rose in vain;
That Land cannot such Venom long contain.
Then when the Harp's new string'd and tun'd you see,
By th' *English* Hand, 'twill make sweet Melody.

June hath XXX Days.

The Eagle now divided in her Breast,
 As well as Head, with various Thoughts oppress.
 The Belgick Lyon fain would rampant be,
 And not lie couchant, under Jove's fair Tree.
 I pity some, of whom 'twas said of late,
 Their high swoln Fortunes, drives a desperate Rate.

July hath XXXI Days.

The Season of the Year, doth all invite,
 To have a Care of Natures chief Delight:
 'Tis good to cleanse your Bodies, and 'tis Reason,
 That you therein oblerve Natures Season.
 Of Natures Treasures, Health of Body's best,
 It is a Diadem worth all the rest.

August hath XXXI Days.

Great Causes like Events do presuppose,
 The Cedars tall each other do oppose;
 And though their lofty Heads to stoop they Scorn,
 They're forc'd to yield unto a furious Storm:
 The lowest Shrubs from Tempests free do rest,
 They, of all others, live compleatly blest.

September hath XXX Days.

If it be so among the heavenly Train,
 Sometimes agree, and soon fall out again :
 If in their nobler Mixtures, they thus change,
 By various Motions, should we think it strange,
 That our corrupted Bodies in their Stations,
 Are subject to so many Alterations.

November hath XXX Days

The Winds are high, and every Man doth know,
That they're full ill that no Man good doth blow;
Some Men in troubled Waters love to fish,
Are glad of Mischief, and for Troubles wish:
But, Lord, let Jars and Discord 'mongst us cease,
Who know thy Son, the mighty Prince of Peace.

Add to the equal Time.

December hath XXXI Days.

Four Planets backward go this Month we see,
 Sure! something more than ordinary th' Effects will
 Time will discover, for with his silent Foot, (be,
 And his sharp Scythe cuts all off at the Root.
 The Times will better be, if we amend,
 And we more fit shall be to make AN END.

PARTIDGE, 1740.

Astrological Observations on the Year 1740.

Of the Brumal or Winter Quarter.

WHICH begins this Year 1739 at *London*, *December 11th*, 52" past 4 in the Morning, equal Time, but the Apparent Time is 53' 7" past 4 the same Morning; at which Time and Place 12° of *Virgo* Culminating, and 21 of $\cap$ Ascending in the *East*, $\mathfrak{h}$ in $\mathfrak{E}$ R in the 8th, with $\mathfrak{d}$ in $\mathfrak{f}$ to $\mathfrak{q}$ in the 2d House: $\mathfrak{v}$ in $\mathfrak{v}$ R in the Western Angle, $\mathfrak{f}$, $\odot$, $\mathfrak{q}$, $\mathfrak{q}$ and $\mathfrak{v}$ in the Second, $\oplus$ in Ω intercepted in the 9th: The Sun being now arrived at the Tropic of $\mathfrak{v}$, makes our longest Night 16^h 26', and shortest Day 7^h 34', his *South* Declination is 23° 29', and Amplitude 39° 50' from the *East* and *West* Points of the Horizon: His Meridian Altitude only 14° 59'. This Quarter continues while the Sun passeth through the three Hyemnal Signs, *Capricorn*, *Aquarius*, and *Pisces*. During which Time you may see,

*How the silly Sapless Trees do shiver,
For Want of Kingly Sol, their Comfort giver.*

Aries England's Ascendent upon the Cusp of the 5th, and *Fes*, *Algires*, &c. being under *Scorpio* on the Cusp of the *Eastern* Finiter; and *Mars*, Lord of those Places, in the second House, indicates, or makes manifest to us, that many People will turn Bankrupts, and that Things for the common Sustenance of Man will advance their Price, many aged People will die, for old slow heel'd $\mathfrak{h}$ is Retrograde in the 8th House, being (according to *Ptolemy*) the House of Death; much Excess and Wantonness will be used in *England*, by Reason of Masquerades, Plays, or Interludes: But we hope our trading Merchant will have many happy Returns of Ships richly laden, for $\oplus$ in the 9th, and *Sol*, Lord thereof in the second, promiseth well: And this Judgment is somewhat strengthened by the *Moon*, as being Part of the 9th Located in the 10th, in $\mathfrak{v}$ a Sign of her own Tri-
The

PARTRIDGE, 1740.

The general Constitution of this Quarter is cold and moist; at the Beginning while the Sun is in *Capricorn*, more cold than moist, during its Residence in *Aquarius* equally mix'd of Cold and Moisture, and when in *Pisces* more moist than cold. Of the four Elements Water is attributed to this Season — Of the Humours Phlegm — Of the Complexions, the Cold and Moist, and of Ages the Decrippit. In this Quarter Phlegmatick Persons are more subject to Sicknes than at other Times; and Cholerick Persons more healthy: Also (Phlegm being predominant) old Men are indisposed and sick, whereas young Men are more active and lively. The Diseases incident to Man in this Quarter are, Plurisies, Inflammation of the Lungs, Rheums, Coughs, Head-Ach, Catarrhs, Apoplexies, Tumors, &c.

*Don't Cattle die? I fear some Mischief reigns,
The sadden Heart for Loss, sighs and complains.*

The Spring Quarter.

Begins when the *Sun* apparently enters the first Scruple of the Equinoctial and Cardinal Sign *Aries*, which this Year 1740 falls on *Sunday March 9* in the Morning, according to the following Calculation.

	s.	o	'	"
<i>Anno</i> 1740, Suns Mean Long.	9	20	17	10

PARTRIDGE, 1746.

The Apparent Time of this solar Ingress is *March 9, 45' 45"* past 6 in the Morning. At which Time at *London* we have 10° $\vee$ S Culminating, and 25° $\vee$ Ascending, *Saturn* stationary to Direction in $\otimes$ his Detriment in the 4th, *Jupiter* in Π his Detriment in $\ast$ to $\odot$, he in the Ascendent, and *Sol* in the 12th, in $\odot$ with $\oslash$, where we also find *Mars* in $\approx$, *Cauda* and $\oplus$ in the Medium *Cæli*, and *Moon* in $\dagger$ in the 8th void of Course; thus we find the Heavens posited at the Time of this Solar Ingress: The *Sun* has now neither Right Ascension, Declination nor Amplitude. This Quarter continues 'till the *Sun* (apparently) hath passed through the three Vernal Signs, *Aries*, *Taurus*, and *Gemini*.

*Now do the Birds begin to warble forth
Sweet Notes, to welcome Phebus to his Court:
He to requite them clotheth with rich Green
All Trees and Plants, most Glorious to be seen;
And by his quick'ning Vertue doth produce,
A new Supply of all Things for Man's Use.*

The two Fortunes, *Jupiter* and *Venus*, in the Ascendent, promises a more happy State to *Old England* than the last Quarter did; the Angles of the Figure are possessed by the four Cardinal Signs, which are called by Astrologers moveable, intimating the Affairs of *Christendom* to be in a wavering State: *Jupiter*, in a common Sign, looks as if many Parsons would be *Itinerant*, and walk about from Place to Place to preach to a giddy People, who are never satisfied with sound Doctrine, but listening after whimsical and fantastical Notions, which is often seen to lead the Ignorant into many idle Ways of thinking, to the great disquieting of their precious and immortal Souls.

*You too too light, busy, ambitious Wits,
That Heaven and Earth confound with furious Fits.
Fantastick Franticks, that would innovate,
And every Moment change your Form of State;
You on rough Seas, as Pilots blind and rash,
Against the Rock of Heaven's just Wrath do dash.*

Let

PARTRIDGE, 1740.

Let the benign Influences of $\mathcal{V}$ ever attend our *British* Isle, and its Inhabitants shall be happy, nothing can prejudice us but our Divisions. The Stars would be as much for us, and more than against us, were it not for the unhappy Position of $\mathcal{J}$, Lord of the Ascendent in the 12th House, and in a fix'd Sign too, shews the Mischief he aims at will be the longer durable: Howbeit, if we are not wanting in ourselves, and inclined to create Jealousies, where, and when there is no just Ground; but would consider how God by his Wisdom hath made every Thing beautiful in its own Season, and how that the Things which seem to affright and consternate us, are designed for our Preservation. If the Bowels would not murmur against the Head, or the Hand say to the Foot, I have no need of thee, but that all would happily concur, and unanimously provide for the Conservation and Support of the whole: I say, if we could be so happy as to consider these Things calmly and seriously, we might be (as in Truth we are all ready, though we cannot, or will not see it,) the happiest Nation in the World; and enjoy the Blessings of Providence in a large Proportion, while our neighbouring Nations round about, are fighting and tearing each other to Pieces, burning, spoiling, and wasting one another; constantly alarm'd with Noise of Drums and Trumpets, hard Taxes and severe Contributions from opposite Parties, while we sit quietly under our own Vines, and reap the Fruits of our own Endeavours in Peace; lying as it were upon Beds of Ivory, and drinking out Wine in Bowls; never minding the Benefits we enjoy under a quiet Government and a merciful Prince. *Oh! England, if thou wilt be happy, esteem thy Peace a Blessing.*

The Summer-Quarter.

THIS Quarter begins on *Tuesday* the 10th Day of *June*, 56' 49" past 5 o'Clock in the Morning equal Time, but the Apparent Time at *London* is 55' 40" past 5 the same Morning, when bright *Sol* toucheth the first Scruple of the Tropical Sign *Cancer*, making our longest Day 16 Hours 26 Minutes, and shortest Night 7^h 34', the *Sun's* Right

PARTRIDGE, 1740.

Ascension being $90^{\circ} = 6$ Hours, his Declination $23^{\circ} 29'$, and Amplitude $39^{\circ} 50'$ North, and Meridian Altitude $61^{\circ} 57'$. There is upon the Cusp of the 10th House $29^{\circ} \times$, and $26^{\circ} \odot$ ascends our Eastern Horizon, Mars in the 10th in γ , α , φ , ψ , and $\oplus$ in the 11th House, $\odot$, Ω , and η in the 12th, and φ on the Cusp of the second in $15^{\circ} \Omega$: Thus are the Heavens posited at the Time of this solar Ingress; Astrologers advise, that in every Revolution of the World, we should be sure to remember the Eclipses of the Luminaries, for they are of great Signification to Mankind, as Experience sufficiently testifies. Now here are two in the Month of *June*, but both being invisible to us in *England*, are not worth our farther Notice. *Aries*, *England's* Horoscope, intercepted in the 10th House, and Mars Lord thereof in γ , his Detriment stirs up Commotions, many sly Projects carried on, to deceive (if it were possible) the Wifest of Statesmen. The *Sun* hath ever Signification of the Heart; and this in Kingdoms and Nations, as Persons. And if the Heart be at any Time afflicted, obnubilated, or oppressed, whether by the Δ , the natural Powers; or by η or δ , the Spleen or Gall, &c. it bodes Disturbance to the whole Body; and the best Physicians, in dangerous Distempers, ever strive in the first Place to fortify and support the Heart. *July* 9, the *Sun* comes to δ with η in $27^{\circ} \odot$ near the Cusp of the Ascendant; great Assemblies and Conventions, to debate of weighty Affairs, both of Human and Divine, of altering and abolishing old, and making new Laws in Church and State. But an elderly *Saturnine* Heroe leaves this Life (we hope) for a better, to the great Gladding of some Sorts of Men, but Consternation of others; and thereby great Councils are at a stand. But be this Demi-God who he will, his Death will be but little lamented at the present. The 1st and 10th Houses are possess'd by Signs of the watery Triplicity, and the other two Angles of the Figure by Earthy Signs: Mother *Gin* being raised to Life again may probably occasion more Imprisonments than usual, and thereby cause many to end their Days therein, which occasions the Poet to sing.

PARTRIDGE, 1740

*Gin was before the Act of Five the Bane,
But Seventy five have since the Act been slain;
Hence, it appears informing crying Sin,
Is more destructive fifteen Times than Gin.*

However, I advise the Gin-drinkers seriously to consider that their Time is short, and Drunkenness dangerous, therefore read seriously and often these Texts of Scripture, viz. *Prov. xxiii. 21. Isaiah xxviii. 1. Jerem. xxv. 27. Joel i. 5. Gal. v. 21. Ephes. v. 18. St. Luke xxi. 34. Rom. xiii. 13. 1 Cor. vi. 10. &c.* Let the Drunkards get them off by Heart, and that will be a means to wean them from so vicious and damnable a Sin. *Cauda Draconis* in the 6th (Astrologers say) stirs up Servants to Thieving and false Witness. *Jupiter* and *Mercury* conjoin'd in the *Twin-City*; some learned Divine or Lawyer very busy about some weighty and important Affair with the Merchants of the Metropolis of *England*, and will gain their Point, for *Mercury* is essentially dignified.

*Observe some Doctors purchasing Promotions,
Whilst the Church-yards swell with their noxious Potions,
Who (Hangman like) fearless and shameless too,
Are pray'd and paid for Murders that they do.*

Of the Autumnal or Harvest-Quarter.

THIS Quarter begins on *Thursday September 11*, at 7^h 10' 58" PM, but the Apparent Time is 7^h 18' 38" the same Day, the *Sun* then entering the first Scruple of the Equinoctial Sign *Libra*, making the Days and Nights again equal, all the World over, except under the Poles. At *London* we have ☿ 18° Culminating, and ☿ 13° ascending, all the Planets are under the Earth, we find ♀ and ♂ conjoin'd in the third with ♄ in ☾, *Saturn* and ♀ in the 5th House in ♏, *Sol*, *Mercury*, and the *Moon* in the 6th House, *Sun* and *Moon* intercepted in *Libra*, ♀ is essentially dignified by House, ♄ in his Detriment, ♀ in his Exaltation, ♂ in his Fall, ☉ in the Ascendent, and

PARTRIDGE, 1748.

Capda in the ninth House ; Thus are the Heavens posited at the Time of this solar Ingress. This ☿ of ♀, ☿ falls in the Terms of *Jupiter*, and Decanate of *Vannus, sub Terra* ; the Effects will be close and subtile, malicious, crafty and treacherous Actions amongst Brethren, giving heed to idle and unprofitable Things, and not only single Persons, but Societies of Men who have ♀ or ☿ concerned in their Nativities, will feel the Influence of this ☿ ; *Scotland, Holland, Russia, and Constantinople* will feel the Effects thereof in some Kind or other ; there will arise mighty Discontents and Troubles to Mankind in general, possibly some famous Battle, or Naval Conflicts near at Hand : *North, or North-East*, many Abortives among Women with Child, for ♀ and ☿ are in the 5th : Great Frauds and Treacheries discovered amongst Persons pretending Piety, many Piracies at Sea and Shipwrecks, for ☿ in the 9th denotes as much. The *Moon* is hastening to * ♀, she (the ☾) is in the 6th Angle, a Place of Servitude and Bondage ; this may possibly mollify and abate the Malignity of *Saturn*, and turn his baser Venom into an Antidote of Preservation, Peace and Plenty. At the latter End of this Quarter four Planets are Retrograde, and the *Sun* suffers an Eclipse, in the Terms of *Mars* and Decade of *Saturn*, *Spain's* Ascendent on the Cusp of the 8th, the House of Death ; Synods and Conventions are held upon divers weighty Affairs, Ambassadors sent from Place to Place, in order to heal, or make up some former Breaches.

*O'er Spain I see a fermament of Losses,
With Atlas Load, of inevitable Crosses
May visit them, while they securely sit,
They had need to use their Magazine of Wit.*

In *November* under the Lunations on the Right Hand Page we have given a Hint of the Birth-Place of my Lord *Monteagle*, who discovered the Popish Plot in King *James* the First's Time, the whole Story is this, See *Magna Britannia*, Fcl. 1298.

Hornby-Castle, (not far from *Lancaster*) a fine Building, which glories in its Founder ; *Nicholas de Mont Begon*, and its present Lords, the *Harringtons*, and the *Stanleys*, Barons
de

PARTRIDGE, 1740.

de Monte Aquila, or *Monteagle*, descended from *Thomas Stanley*, first Earl of Derby: *William Stanley*, the third and last Baron of *Monteagle*, of that Name, left only a Daughter for his Heir, named *Elizabeth*, who married to *Edward Parker*, Lord *Morby*, had a Son *William Parker*, who was restored by King *James I.* to the Barony of *Monteagle*, the Honour belonged to his Ancestors by his Mother's Side. This noble Man must be acknowledged by us, and all our Posterity, to be born for the good of the whole Kingdom, and the Preservation of our Religion; for by an obscure Letter, privately sent him, and produced by him in the very Nick of Time, the most hellish and detestable Treason, that Wickedness itself could project, was discovered and prevented, when the whole Kingdom was at the very Brink of Ruin; for several of the *Romish* Religion had placed thirty-six Barrels of Gun-Powder under the Parliament-House, and had laid the Match ready to have blown up the whole Assembly of the King, Prince, Lords and Commons there met, at one Blow, which being hinder'd by his Discovery, as the Nation hath with just Reason given Thanks to God ever since for this great and wonderful Deliverance; so we ought greatly to own this Person the blessed Instrument of it.

*Of the Eclipses of the Sun and Moon that will
happen in the Year 1740.*

SIX Times to the Inhabitants of this Terraqueous Globe, will the Two great Lights of Heaven come within the Ecliptic Boundaries, three Times the *Sun*, and as often the *Moon*; they happen in the following Order.

The First is a great and visible Eclipse of the *Moon* (Total with Continuance) on *Wednesday* the 2d Day of *January*, according to the following Calculation.

Hence

PARTRIDGE, 1740.

		D.	H.	'	"		
Hence the Apparent Time at London of the	{	Beginning 1740, Jan.	2	8	30	52	} P. M.
		Begin. of total Darknes		9	36	30	
		Middle, or great Darknes	10	25	26		
		True Ecliptic δ	10	25	39		
		End of total Darknes	11	14	22		
		End of the Eclipse	12	20	00		
		Continuance total Dark.	1	37	52		
		Continuance Eclipse	3	49	08		
		Digits Eclipsed are	20	29	00		
Lat. $\mathcal{D}$ at	{	Begin.		3	44	S. Desc.	
End			6	10	N. Asc.		

At the Time of the Middle of this Eclipse, the very Beginning of *Cancer* Culminates, $1^{\circ} \approx$ Ascending $\mathcal{H}$, $\mathcal{V}$ and $\mathcal{Q}$ are Retrograde, $\mathcal{H}$, $\mathcal{Q}$ and $\mathcal{D}$ are in the 10th, $\mathcal{V}$ in the 9th, $\odot$, $\mathcal{S}$, $\mathcal{Q}$, and $\mathcal{V}$ in the 4th House, $\mathcal{Q}$ in the 5th, *Moon* is eclipsed in her own House, and in the House of Honour with *Saturn*, brings much Evil to Women of a high Rank, and mature Years; the Commonality afflicted with Dropfical and other sluggish Diseases; overflowing of the Sea, and Rivers by turns. The *Moon* will pass under $\mathcal{H}$, a little before the Eclipse begins, Pleasant to behold: At the Time of the Beginning of the Eclipse, the *Moon* is Vertical to *Arabia Felix*, and so she travels over the Red Sea, Nigritia at the Middle, and at the End she is Vertical to *Barbary*, in *Africa*. About S. W. you may see the Planet *Jupiter*, with his four *Moons*, the 1st is 5 Semidiameters of $\mathcal{V}$ distant from him to the Right Hand, the 2d is 8. 4 to the Left, the 3d Satellite is 8. 2 to the Right, and the 4th is 21. 1 to the Left, or Eastward of $\mathcal{V}$, that is, if you look at them with two Convex Glasses; but if you View them with a Reflecting Telescope, they will appear on the contrary Side of $\mathcal{V}$, and $\mathcal{V}$ at the same Time is under the seven Stars.

If the Air be clear, I advise all Virtuoso's to make Observations on these rare Phenomena, for first there is $\mathcal{V}$ in $\mathcal{S}$, with the *Pleiades* $4^{\circ} 4' 6''$ under. Second, the $\mathcal{D}$, $\mathcal{S}$, $\mathcal{H}$, and 3d, the *Moon* Totally eclipsed, and at the same Time you may see the Satellites of $\mathcal{V}$, as above described. The

PARTRIDGE, 1740.

The Second Eclipse is of the *Sun*, on *Thursday* the 17th Day of *January*, at 8 o'Clock at Night, and consequently cannot be seen by us in *England*, nor in any Part of *Europe*, it is made in $8^{\circ} \approx$, and will be but small where Conspicuous.

The third Eclipse is of the *Sun*, and Invisible also; it happens on *Friday, June 13*, at 2 o'Clock in the Morning, it will be but small, the *Moon* having great *South* Latitude, it is made in $2^{\circ} \odot$.

The Fourth Eclipse is of the *Moon*, invisible, on *Saturday* the 28th Day of *June*, between 9 and 10 o'Clock in the Morning, in $17^{\circ} \vee$, those that Sail on the *West-India* Ocean will see the *Moon* totally Eclipsed.

The Fifth Eclipse is of the *Sun*, and invisible, on *Sunday, December 7*, at 11 o'Clock at Night, it falls in $27^{\circ} \uparrow$, it will be Visible in the Great Ocean, and *Mare Del Zur*, and well worth Observing

The Sixth and last Eclipse is of the *Moon*, and Visible at *London* (if Clouds hinder not) on *Sunday, December* the 21th, according to the following Calculation, almost one Half of the *Moon's* Body will be Eclipsed by the Earth Shadow on the lower Side, as the Annexed Type more plainly sheweth.

	D.	H.	'	"	
The App. Time at London of the	Begin. is 1740, Dec.	21	10	32	45
	Middle		11	48	59

The

PARTRIDGE, 1746.

The Type.

All the superiour Planets are Retrograde, and *Mercury* is Stationary to Direction, *Jupiter* in the 9th House, to the Right of the *Moon*, *Mars* and *Saturn* in the 10th, to the Left of the *Moon*, all three to be seen very Glorious at the Time of the Eclipse, not far distant from her; all the other Planets are under the Earth. The *Moon* at the Beginning is Vertical to the *Eastern* Parts of *Barbary*, which Place she passeth over during the Time of the Eclipse, so that at the End, she is Vertical to the *Western* Parts thereof, bordering upon the *Atlantick* Ocean. The Face of Heaven now differeth not much from that of the Eclipse in *January* last; the *Moon* in the 10th, in her own House with Retrograde, *Saturn* and *Mars*, this is of some untoward Importance unto those Countries; Persons and Things concerned by the Sign *Cancer*, the eclipsed Sign, and *Capricorn* the opposite thereto; *Scotland*, *Holland*, *Constantinople*, *York*, *St. Andrews*, *Venice*, *Lubeck*, *Genoa* and *Tunis*. From hence we may rationally Predict, that these Countries and Places concerned, will now and then meet with many Difficulties in their publick Negotiations, and some rash and unruly Actions may break forth in them; many Robberies both by Sea and Land will be committed, for ♄ R in the 9th, and ♅, ♄ and ♀ in the 3d, intercepted in ♄, puts the proud *Spaniard* often to his Trumps; and besides these, there may also arise some Disputes in Religion, and many of the Fair Sex (and those of the highest Rank too) will be summoned to the Grave. At the Time of the Middle of this Eclipse, with a good *Telescope* you may see (if the Air is clear) the 4th Satellite of ♄ at

PARTRIDGE, 1740.

♄ at its greatest Elongation from him to the *East* of him; the 1, 2, and 3 are all on the *Right Hand*, or to the *West* of ♄, the 3d is the nearest to him, being only 2. 6 Semidiameters distant from him; the first is 4, 5, and the 2d, 9, 3 Semidiameters from him. Besides these *Luminarian* Eclipses, there will be a notable Transit of *Mercury* over the *Sun*, on *Monday, April 21*, at *Midnight*, therefore invisible at *London*, but in the *Western* Parts of the *World*, and also in *China*, and at the *Japan Isles* it may be seen.

These Eclipses in general do portend great Fondness and Fickleness in Women, whose Love (like Breath on Steel) will soon on and quickly off, being all in Extreams, either too forward or too froward; too courteous, or too coy; too willing, or too wilful; too merciful, or merciless; too loving, or too loathful; the mean they always meanly Account of, and by this Forwardness, or Averseness of Women, we may safely Predict, that few Men with their Wives will go to *Dunmow Priory* (in *Essex*) to claim a Flitch of Bacon, because, those who are to have it, must humbly Kneel upon their Knees on two Stones at the Church Door, and their take the ensuing Oath.

*You shall swear by the Custom of our Confession,
That you never made any Nuptial Transgression
Since you were married Man and Wife,
By Household Brawls, or Contentious Strife,
Or otherwise at Bed, or at Broad,
Offended each other in Deed or Word:
Or since the Parish Clerk said Amen,
Wished yourselves unmarried again.
Or in a twelve Month and a Day,
Repented not in thought any Way;
But continued true, and in desire,
As when you joined Hands in holy Quire, (Choir)
If to these Conditions, without all Fear,
Of your own Accord, you will freely swear;
A Gammon of Bacon, you shall receive,
And bear it hence with Love and good Leave:
For this is our Custom at Dunmow, well known,
Tho' the Sport be ours, the Bacon's your own.*
